Publication Title:

DISPLAY UNIT FOR CAR

Abstract:

Abstract of JP2000142173

PROBLEM TO BE SOLVED: To provide a display unit hindering certainly the driver's attention from being distracted even in case images are being given to other occupant and also capable of giving information to the driver, if necessary, without requiring the driver to make manual operation of the display unit. SOLUTION: A display unit for use in a car is furnished with a display 2 of such an arrangement that one image on the display is visible from only one view field region, wherein images 3 and 4 independent of each other are displayable on the display 2 using an optical element 6 in such an arrangement that the first image 3 is visible only from the first view field region α while the second image 4 is visible only from the first view field β .
